

HOME OWNERSHIP ADVISORY SERVICE (HOAS)

OVERVIEW

Home Ownership Advisory Service (HOAS) is an education first, service-based platform designed to help tenants move away from long-term renting and toward safe home ownership or financial readiness for future ownership.

The core idea is simple: **instead of paying rent every month with no long-term return, the same amount can be structured either as EMI or as disciplined investment to achieve home ownership, provided it is financially safe.**

HOAS does not begin with selling property or pushing loans. It begins with **clarity, assessment, and guidance**. Customers are first helped to understand their financial position and are then guided into the appropriate path based on their ownership readiness and financial circumstances.

PROBLEM

Tenants continue paying rent for many years without creating any asset. Most tenants believe home ownership is not possible due to poor CIBIL scores, lack of income proof, or confusion around EMI affordability and documentation.

Existing market players focus on **selling property or processing loans**, without first addressing whether the customer is financially ready. This results in rejected loans, financial stress, and long-term dependency on renting.

OUR SOLUTION

HOAS starts with **education and financial assessment before any property discussion**. We do not sell first, we advise first.

The customer journey follows a disciplined process:

- Rent vs EMI (Ownership analysis)
- Financial stability and affordability assessment
- EMI comfort analysis and repayment capacity analysis
- CIBIL and documentation review
- Home loan readiness assessment
- Govt scheme and subsidy eligibility
- Personalised Home Ownership Roadmap preparation

Based on this assessment, customer is guided into one of two paths, without pressure.

Path 1 – Ownership Ready

Customers who meet the required financial and eligibility criteria are guided towards home ownership through, loan assistance, and ownership planning.

Path 2 – Ownership Preparation Program

Customers who are not immediately ready for ownership receive a structured roadmap outlining the steps required to improve eligibility, strengthen financial readiness, and prepare for future home ownership.

RENT vs EMI (EDUCATION STAGE)

Particulars	Renting a Home	Owning a Home (EMI)
Monthly outflow	₹25,000–₹40,000 Rent	₹26,756–₹45,000 EMI @8% interest
Payment trend	Typically Increases 5% to 10% annually	Mostly fixed / controlled
Total outflow in 120 months	₹48–₹76 Lakhs (approx)	₹33–₹54 Lakhs (approx)
Where does money go?	To House owner	To your own property
Ownership after 120 Months	✗ No	✓ Yes
Long-term benefit	None	Asset Creation & Ownership
Equity Creation	No	Yes
Long-Term Wealth	No	Potential Property Appreciation
Family Stability	Temporary	Permanent
Financial Outcome	Expense	Asset Creation
Legacy Value	None	Transferable Asset
Asset Building	No	Yes
Financial Discipline	Rent Expense	Builds Ownership Equity
Asset Value after 120 Months	₹0	Property Value + Appreciation

WHY HOAS IS DIFFERENT

HOAS is an advisory-led home ownership framework designed to place customer readiness before property selection or loan processing. Unlike traditional market approaches that often begin with selling a property or arranging finance, **HOAS starts with assessment, education, and financial clarity. Every recommendation is based on affordability, repayment capacity, documentation readiness, and long-term sustainability, helping customers make informed and responsible ownership decisions.**

WHO CAN BENEFIT FROM HOAS

HOAS is designed for tenants, first-time home buyers, salaried professionals, self-employed individuals, business owners, and families seeking clarity on their home ownership journey. It is particularly valuable for customers who are uncertain about loan eligibility, EMI affordability, credit profile, documentation requirements, or the right time to purchase a home. Whether ownership is possible today or requires preparation, **HOAS provides a structured pathway towards future ownership readiness.**

WHAT THE CUSTOMER GAINS

Through the **HOAS process**, customers gain a clear understanding of their financial position, ownership readiness, affordable property budget, EMI comfort range, loan eligibility status, and documentation requirements. Customers also receive guidance on credit improvement opportunities, government schemes and subsidy eligibility, and a personalised Home Ownership Roadmap. The outcome is greater confidence, reduced financial uncertainty, and a well-defined plan towards sustainable home ownership.

HOAS OBJECTIVE

The objective of **HOAS** is to help customers make informed, financially responsible, and sustainable home ownership decisions through education, assessment, planning, and guidance.

By focusing on financial readiness before property selection or loan processing, **HOAS** aims to reduce uncertainty, improve decision making, and support long-term ownership success.

HOAS does not guarantee loan approval, property appreciation, or ownership eligibility. All assessments and recommendations are based on the customer's financial profile, affordability, documentation readiness, lender policies, and applicable regulations.

CONCLUSION

Home ownership should begin with clarity, not confusion.

Many families continue renting for years without understanding their actual ownership potential. HOAS addresses this gap by providing a structured framework that helps customers evaluate their readiness, understand their options, and make informed decisions based on their individual financial circumstances.

Through education, assessment, and personalised guidance, **HOAS supports customers in building a practical and sustainable pathway towards home ownership.**
